## JAC Announces Representative Agreement with VULCANAIR S.p.A.

JAPAN AEROSPACE CORPORATION (Headquartered in Minato-Ku, Tokyo; President & CEO Hitoshi Tanimura; hereinafter “JAC”), a subsidiary of ITOCHU Corporation (Headquartered in Minato-Ku, Tokyo; President & CEO Masahiro Okafuji; hereinafter “ITOCHU”) has announced today that it has entered into a Representative Agreement with Vulcanair S.p.A. (Headquartered in Casoria, Italy; Chief Executive Officer Remo De Feo; hereinafter “Vulcanair”) in relation to the exclusive authorized sales of Vulcanair aircraft in Japan.

Vulcanair P68R (Vr)

Originally founded under the name Partenavia in 1957 by renowned Italian Aeronautical Engineer Professor Luigi Pascale, today, Vulcanair continues the legacy in designing and manufacturing single (V1.0) and twin engine (P.68 Series and A-Viator) aircraft that encompasses elegant Italian design and styling, innovative and reliable engineering, and with handcrafted and robust construction methods. With excellent and docile flying characteristics shared by all of Vulcanair’s aircraft, Vulcanair offers a safe and reliable aircraft to Japan’s General Aviation marketplace for both business and pleasure flights. Furthermore, with low fuel consumption during flight, a trait shared by the entire fleet, Vulcanair’s aircraft offers a compelling value proposition to the General Aviation marketplace in Japan by not only having a lower operating cost than other similar aircraft but also by being environmentally friendly. Additionally as a proven and versatile platform, the low operating costs of Vulcanair aircraft is an excellent choice for both the Private and Government sector in Aerial Works such as Flight Training, Aerial Survey, Powerline Patrol, Fisheries and Maritime Patrol, Homeland Security, and so on.

As a pioneer in the importation of aircraft in Japan, JAC is pleased to be named as Vulcanair's exclusive authorized sales representative for Japan, and will utilize over 60 years of market knowledge in the marketing of Vulcanair aircraft to the General Aviation, Aerial Work Companies, and Government Ministries and Local Agencies in Japan.
